Engineered with the **same OE quality**, these aftermarket SCR are an excellent choice for those *seeking rapid replacements at competitive pricing*.

**GENUINE PART NUMBER:
KENWORTH A052V133**

EQUIP YOUR TRUCKS WITH SCR TECHNOLOGY FOR CLEANER EMISSIONS

Selective Catalytic Reduction (SCR) is a cutting-edge technology widely adopted in the trucking industry to reduce harmful exhaust emissions. By introducing a liquid-reductant agent through a special catalyst into the exhaust stream of a diesel engine, SCR converts nitrogen oxides, a major contributor to air pollution, into harmless nitrogen and water.

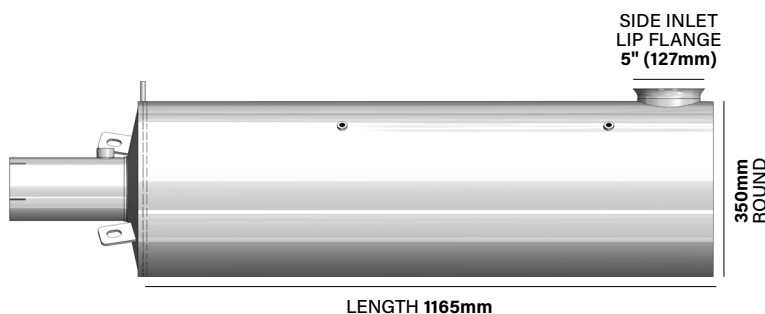

This technology not only meets stringent emission regulations but also improves fuel efficiency and optimizes overall vehicle performance.

**MADE IN
AUSTRALIA**

**PROUDLY AUSTRALIAN MADE
DESIGNED & MANUFACTURED LOCALLY
TESTED. TRUSTED. PROVEN.**

- Typically made from 304 stainless steel (SS)
- Low-maintenance
- Reduced emissions
- Integrate seamlessly
